EXPERIENCE

AAS Information Technology

Dubai , U.A.E

Frontend Developer

01 May 25 – Present

- Worked on a Construction CRM SaaS, including Figma design, product documentation, and creating a reusable component library.
- Developed **Budgzyx (PWA)** — an expense tracker with budgets and PDF export features.
- Contributed to **HRMS product sales outreach** in the Dubai market with scalable web and Flutter solutions.
- Supported development across web and mobile using **Next.js** and **Flutter**.
- Collaborated with teams to improve design workflows and product delivery.

AAS Information Technology

Bhubaneswar , Odisha , India

Tech Support Staff (Intern)

02 Dec 24 – 01 Mar 25

- Learned industry-level workflows and contributed to projects using **TypeScript, Next.js, and shadcn/ui**.
- Supported development tasks for the **HRMS system** and **AAS Website**.
- Improved UI/UX implementation through structured component development.

PROJECTS

Budgzyx – Expense Tracker (PWA) [live link](#)

Oct 2025

- Built a PWA-based expense tracker with category-wise budgets, bank splits, and real-time usage tracking.
- Integrated PDF export and optimized for smooth offline-first usage.
- Used **Next.js, Supabase, and Tailwind CSS** to deliver a fast, responsive experience.

AAS HRMS Marketing Landing Page [live link](#)

Sep 2025

- Designed and built a marketing landing page to showcase HRMS features, workflows, and product benefits.
- Added a **live demo booking** flow and an **interactive “experience HRMS inside the page”** preview.
- Developed using **Next.js** and **shadcn/ui** for fast, clean, and responsive UI.

AAS HRMS System

Mar 25 - Aug 25

- Contributed to a secure HRMS system with payroll, attendance, performance management and employee tracking features .
- Worked on components, dashboard UX, and system flows. using **Next.js, TypeScript, and shadcn/ui**

AAS Website – Modern Agency Website [live link](#)

Apr 2025

- Developed a clean and modern company website with smooth animations and dynamic contact forms
- Improved performance, responsiveness, and UI consistency.
- Built with **Next.js, React, and Tailwind CSS**.

ACHIEVEMENTS

- Built and delivered multiple production-ready applications including a CRM platform, HRMS modules, and a PWA expense tracker using **Next.js, TypeScript, Supabase, and shadcn/ui**.
- Designed reusable UI component libraries and improved UI/UX across company products, increasing development speed and consistency.
- Created a full **HRMS Marketing Landing Page** with feature showcase, live demo booking, and interactive product previews.
- Improved website performance, SEO, and accessibility across AAS platforms, contributing to better user engagement and faster load times.
- Strengthened frontend engineering skills through hands-on work with **Next.js, React, TypeScript, Tailwind CSS**, and modern design systems.
- Collaborated with cross-functional teams to enhance product quality, streamline workflows, and support successful feature launches.
